REASONS FOR ALLOWANCE

1. This is an Examiner's statement of reasons for allowance. The closest prior art Downs et al U.S. Pat. No. 6,574,609 discloses a right management in the secure digital content electronic distribution system that is implemented through a set of functions distributed among the operating components of the system.

JP02004227042A; Kamimura et al discloses a license distribution server, license re-issuing device connected to the same and store front server.

However, neither Downs nor Kamimura singularly or in combination fail to disclose the recited feature:

As per claims 1, 14, 25, 38, 49, 60, and 67 " a digital rights management system on the computing device for authorization for such rendering based on such digital license and upon the digital rights management system notifying the rendering application that such digital license is not available on the computing device, allowing a user to communicate with the license server by way of the hosted browser to acquire the digital license, receiving the digital license from the license server, and shutting down, by the hosting rendering application, the hosted browser upon receiving the digital license".

As per claims 21, 45, 63 " if the attempt to silently acquire the digital license fails, allowing a user to attempt to acquire the digital license from a license server by way of a browser hosted by the rendering application that is initiated by the rendering application, under the control of such rendering application, and viewed within the context of the rendering application".

Conclusion
